KERION CERAMICS

you dream,
we create.

Innovative ceramic solutions for floor and wall coverings, with a focus on quality, versatility and technical precision. Founded in 2009, Kerion brings together ceramic tradition and contemporary technology, with close attention to detail, texture and chromatic consistency.

The development of the collections responds to the requirements of architecture, interior design and renovation, with proposals conceived for different application contexts.

Production processes and practices follow principles of efficiency, environmental and social responsibility, and social commitment. The brand positions itself as a reference partner for professionals seeking distinctive and reliable ceramic solutions.

Solutions céramiques innovantes pour sols et revêtements, avec un accent sur la qualité, la polyvalence et la rigueur technique. Fondée en 2009, Kerion associe la tradition céramique à la technologie contemporaine, avec une attention particulière portée au détail, à la texture et à la constance chromatique.

Le développement des collections répond aux exigences de l'architecture, de la décoration intérieure et de la réhabilitation, avec des propositions conçues pour différents contextes d'application.

Les processus et pratiques de production suivent des principes d'efficacité, de responsabilité environnementale et sociale, ainsi que d'engagement social. La marque s'affirme comme un partenaire de référence pour les professionnels à la recherche de solutions céramiques distinctives et fiables.

Soluções cerâmicas inovadoras para pavimentos e revestimentos, com foco na qualidade, versatilidade e rigor técnico. Fundada em 2009, a Kerion cruza tradição cerâmica e tecnologia contemporânea, com atenção ao detalhe, à textura e à consistência cromática.

O desenvolvimento das coleções responde às exigências da arquitetura, da decoração e da reabilitação, com propostas pensadas para diferentes contextos de aplicação.

Processos e práticas de produção seguem princípios de eficiência, responsabilidade ambiental e compromisso social. A marca afirma-se como parceiro de referência para profissionais que procuram soluções cerâmicas distintas e fiáveis.

Innovative Keramiklösungen für Böden und Wandbeläge, mit Fokus auf Qualität, Vielseitigkeit und technische Präzision. Gegründet im Jahr 2009, verbindet Kerion keramische Tradition mit zeitgenössischer Technologie, mit Aufmerksamkeit für Details, Textur und Farbkonstanz.

Die Entwicklung der Kollektionen orientiert sich an den Anforderungen von Architektur, Innenausstattung und Sanierung, mit Konzepten, die für unterschiedliche Anwendungsbereiche gedacht sind.

Produktionsprozesse und -praktiken folgen Prinzipien der Effizienz, ökologischen Verantwortung und sozialen Verpflichtung. Die Marke positioniert sich als verlässlicher Partner für Fachleute, die nach unverwechselbaren und zuverlässigen Keramiklösungen suchen.

CERAMIC TAILORS

custom solutions
for architecture.

Customisation based on client request, limited to the available formats and dimensions. It allows the development of pieces using a client-provided design or colour variations applied to existing references.

A solution suited to projects that require differentiation and visual coherence, without compromising technical and production requirements.

Each development follows a process with technical precision and quality control to ensure chromatic consistency and reliability on site.

Personnalisation sur demande du client, limitée aux formats et dimensions disponibles. Elle permet de développer des pièces à partir d'un dessin fourni par le client ou d'appliquer des variations de couleur sur des références existantes.

Une solution adaptée aux projets nécessitant de différenciation et cohérence visuelle, sans compromettre les exigences techniques et productives.

Chaque développement suit un processus fondé sur la rigueur technique et le contrôle qualité afin d'assurer la constance chromatique et la fiabilité en oeuvre.

Personalização por pedido do cliente, limitada aos formatos e dimensões disponíveis. Permite desenvolver peças com desenho do cliente ou com variações de cor aplicadas a referências existentes.

Uma solução indicada para projetos que exigem diferenciação e coerência visual, sem comprometer os requisitos técnicos e produtivos.

Cada desenvolvimento segue um processo com rigor técnico e controlo de qualidade para assegurar consistência cromática e fiabilidade em obra.

Personalisierung nach Kundenwunsch, im Rahmen von verfügbaren Formaten und Größen. Die Entwicklung von Teilen mit Kundendesign oder Farbvariationen auf Basis bestehender Referenzen ist möglich.

Eine geeignete Lösung für Projekte, die Differenzierung und visuelle Kohärenz verlangen, ohne die technischen und produktiven Anforderungen zu beeinträchtigen.

Jede Entwicklung folgt einem Prozess mit technischem Know-how und Qualitätskontrolle, um Farbkonstanz und Zuverlässigkeit in der Anwendung zu gewährleisten.

Porcelain stoneware for floor and wall coverings, designed to meet technical and aesthetic requirements in architecture, interior design and renovation projects. Suitable for indoor and outdoor application.

Kerion brings together ceramic tradition and contemporary technology, with attention to detail, texture and chromatic consistency, to ensure visual coherence and reliability in application.

Grès cérame pour sols et revêtements, conçu pour répondre aux exigences techniques et esthétiques des projets d'architecture, de décoration intérieure et de réhabilitation. Adapté à une application intérieure et extérieure.

Kerion associe la tradition céramique à la technologie contemporaine, avec une attention portée au détail, à la texture et à la constance chromatique, afin de garantir une cohérence visuelle et une fiabilité à la pose.

Grés porcelânico para pavimentos e revestimentos, concebidos para responder a exigências técnicas e estéticas em projetos de arquitetura, decoração e reabilitação. Adequados para aplicação em interior e exterior.

A Kerion alia tradição cerâmica e tecnologia contemporânea, com atenção ao detalhe, à textura e à consistência cromática, para garantir coerência visual e fiabilidade na aplicação.

Feinsteinzeug für Böden und Wandverkleidungen, konzipiert, um technischen und ästhetischen Anforderungen in Architektur-, Dekorations- und Sanierungsprojekten gerecht zu werden. Geeignet für Innen- und Außenbereiche.

Kerion verbindet keramische Tradition und zeitgenössische Technologie mit Augenmerk auf Detail, Textur und Farbkonstanz, um Kohärenz, visuelle Qualität und Zuverlässigkeit in der Anwendung zu gewährleisten.

Porcelain stoneware mosaics, multilayer pressed, produced with dry glazes and fired at temperatures above 1200 °C. The process uses a sustainable technology with no water consumption and full reintegration of production waste.

The thick layer of dry glaze and the characteristics of porcelain stoneware ensure high resistance to demanding conditions, such as thermal shock, intense UV radiation and submerged environments, with colour and finish stability.

Installation using a dot-mounting system ensures constant joint width, high flexibility and dimensional stability: the sheet adapts to curved surfaces but does not stretch, maintaining sheet dimensions and joint regularity.

Mosaïques en grès cérame pressé multicouche, produites avec des émaux secs et cuites à des températures supérieures à 1200 °C. Le processus utilise une technologie durable, sans consommation d'eau, avec une réintégration totale des pertes de production.

L'épaisse couche d'émail sec et les caractéristiques du grès cérame garantissent une résistance élevée à des conditions exigeantes, telles que les chocs thermiques, les rayonnements UV intenses et les environnements immergés, avec une stabilité de la couleur et de la finition.

La pose par système de points de colle assure une largeur de joint constante, une grande flexibilité et une stabilité dimensionnelle : la feuille s'adapte aux surfaces courbes sans s'étirer, ce qui maintient les dimensions de la feuille et la régularité des joints.

Mosaicos em grés porcelânico prensados em multicamada, produzidos com esmaltes secos e cozadura a temperaturas superiores a 1200 °C. O processo recorre a uma tecnologia sustentável, sem consumo de água, com reintegração total das perdas de produção.

A espessa camada de esmalte seco e as características do grés porcelânico garantem elevada resistência a condições exigentes, como choque térmico, radiação UV intensa e ambientes submersos, com estabilidade da cor e do acabamento.

A montagem por sistema de pontos de cola assegura uma junta constante, elevada flexibilidade e estabilidade dimensional: a folha adapta-se a superfícies curvas, mas não estica, o que mantém a dimensão da folha e a regularidade da junta.

Mosaïke aus gepresstem Feinsteinzeug in Mehrschichttechnik, hergestellt mit trockenen Glasuren und bei Temperaturen über 1200 °C gebrannt. Der Prozess nutzt eine nachhaltige Technologie ohne Wasserverbrauch, mit vollständiger Wiederverwendung der Produktionsverluste.

Die dicke Schicht aus trockener Glasur und die Eigenschaften des Feinsteinzeugs gewährleisten eine hohe Widerstandsfähigkeit unter anspruchsvollen Bedingungen, wie thermischem Schock, intensiver UV-Strahlung und überfluteten Umgebungen, mit Farbstabilität und Oberflächenbeständigkeit.

Die Montage mittels Punktklebesystem sorgt für gleichmäßige Fugen, hohe Flexibilität und Maßstabilität: das Blatt passt sich an gekrümmte Oberflächen an, dehnt sich jedoch nicht aus, wodurch die Blattgröße und die Gleichmäßigkeit der Fuge erhalten bleiben.

USEFUL INFORMATION

informações úteis
informations utiles
technische information

GENERAL INFORMATION

informações gerais • informations générales • allgemeine informationen

Regular Cleaning

Glazed porcelain stoneware products are recognised for their durability and aesthetic appeal. To preserve their visual appearance and prevent the build-up of dirt, grease, detergent residues, sealants, moisture and liquids, regular cleaning and maintenance are recommended.

Care should be taken when selecting cleaning products and techniques. Aggressive chemicals such as bleach, ammonia or vinegar should be avoided, as they may damage the glaze and the joint over time. Use cleaning products specifically formulated for porcelain stoneware and follow the manufacturer's instructions regarding dilution and application.

Shade Variation

Shade variation may range from none to low, slight, moderate or substantial, with a direct impact on the final aesthetic result. To achieve a balanced appearance, mixing tiles from different boxes is recommended, particularly in cases of moderate or substantial shade variation.

Shade variation may occur due to differences inherent to the manufacturing process. All samples provided are indicative of colour only and are not binding.

Nettoyage régulier

Les produits en grès cérame émaillé se distinguent par leur résistance et leur qualité esthétique. Afin de préserver l'aspect visuel et d'éviter l'accumulation de saletés, de graisses, de résidus de détergents, de produits de scellement, d'humidité et de liquides, un nettoyage et un entretien réguliers sont recommandés.

Le choix des produits et des techniques de nettoyage doit être effectué avec soin. Les produits chimiques agressifs, tels que l'eau de Javel, l'ammoniaque ou le vinaigre, doivent être évités, car ils peuvent endommager l'émail et les joints au fil du temps. Il est recommandé d'utiliser des produits de nettoyage spécifiquement formulés pour le grès cérame et de suivre les instructions du fabricant concernant la dilution et l'application.

Variation de teinte

La variation de teinte peut aller d'inexistante à faible, légère, modérée ou importante, avec un impact direct sur le rendu esthétique final. Afin d'obtenir un résultat équilibré, il est recommandé de mélanger des pièces provenant de différentes boîtes, en particulier lorsque la variation de teinte est modérée ou importante.

La variation de teinte peut résulter de différences inhérentes au processus de fabrication. Tous les échantillons fournis sont donnés à titre indicatif de couleur et ne sont pas contractuels.

Limpeza regular

Os produtos em grés porcelânico vidrado destacam-se pela resistência e pelo apelo estético. Para preservar o aspeto visual e evitar a acumulação de sujidade, gordura, resíduos de detergentes, selantes, humidade e líquidos, recomenda-se uma limpeza e manutenção regulares.

A escolha dos produtos e das técnicas de limpeza deve ser criteriosa. Evite químicos agressivos, como lixívia, amoníaco ou vinagre, pois podem danificar o vidrado e a junta ao longo do tempo. Utilize produtos de limpeza específicos para grés porcelânico e siga as instruções do fabricante quanto à diluição e ao modo de aplicação.

Variação de tonalidade

A variação de tonalidade pode oscilar entre inexistente, baixa, ligeira, moderada ou substancial, com impacto direto no resultado estético. Para um aspeto equilibrado, recomenda-se a mistura de peças de diferentes caixas, sobretudo quando existe variação moderada ou substancial.

A variação de tonalidade pode resultar de diferenças inerentes ao processo de fabrico. Todas as amostras fornecidas são meramente indicativas de cor e não são vinculativas.

Regelmäßige Reinigung

Glasierte Porzellansteinzeugprodukte zeichnen sich durch ihre Widerstandsfähigkeit und ihre ästhetische Qualität aus. Um das Erscheinungsbild zu erhalten und die Ansammlung von Schmutz, Fett, Reinigungsmittelrückständen, Dichtstoffen, Feuchtigkeit und Flüssigkeiten zu vermeiden, wird eine regelmäßige Reinigung und Pflege empfohlen.

Bei der Auswahl der Reinigungsprodukte und -methoden ist Sorgfalt geboten. Aggressive Chemikalien wie Bleichmittel, Ammoniak oder Essig sollten vermieden werden, da sie Glasur und Fugen im Laufe der Zeit beschädigen können. Es wird empfohlen, speziell für Porzellansteinzeug entwickelte Reinigungsmittel zu verwenden und die Herstellerangaben zu Verdünnung und Anwendung zu beachten.

Farbvariation

Die Farbvariation kann von keiner über gering, leicht und mittel bis hin zu stark reichen und hat einen direkten Einfluss auf das ästhetische Erscheinungsbild. Um ein ausgewogenes Ergebnis zu erzielen, wird empfohlen, Fliesen aus verschiedenen Kartons zu mischen, insbesondere bei mittlerer oder starker Farbvariation.

Farbabweichungen können aufgrund von Unterschieden im Herstellungsprozess auftreten. Alle zur Verfügung gestellten Muster dienen ausschließlich zur Farborientierung und sind nicht verbindlich.
